

CREATE A DATABASE IN CLOUDANT DB

Date	28/8/2022
Team ID	PNT2022TMID21776
Project Name	Project – IOT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks

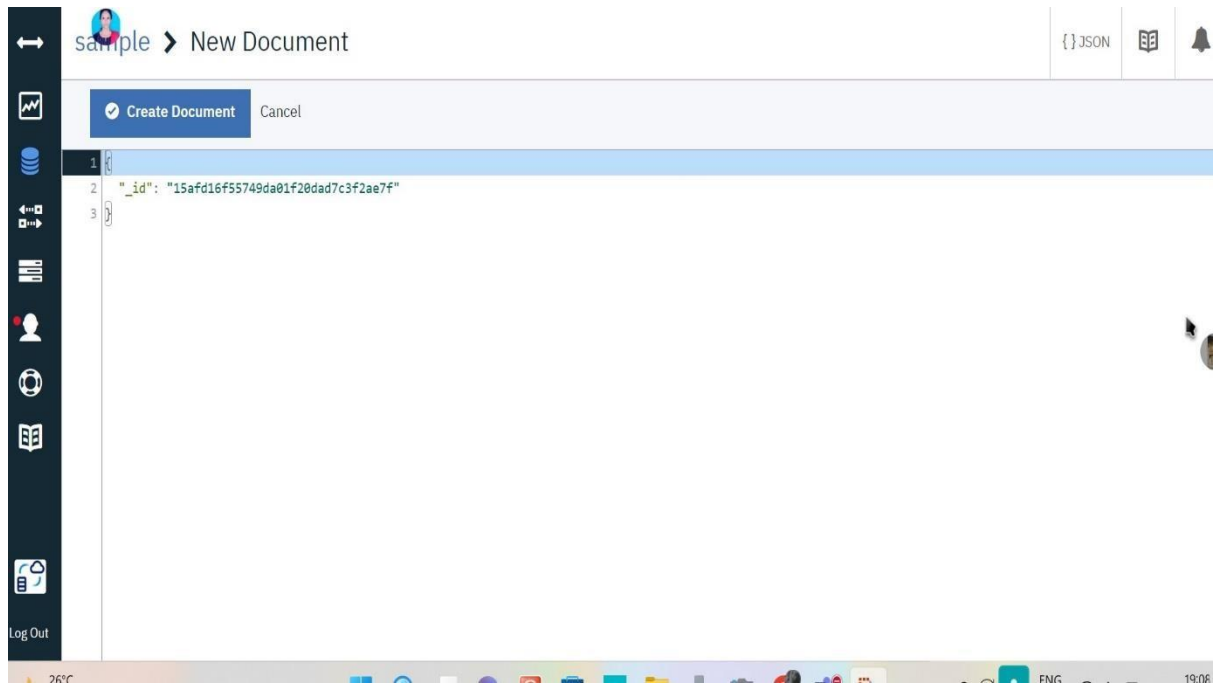

STEP 1

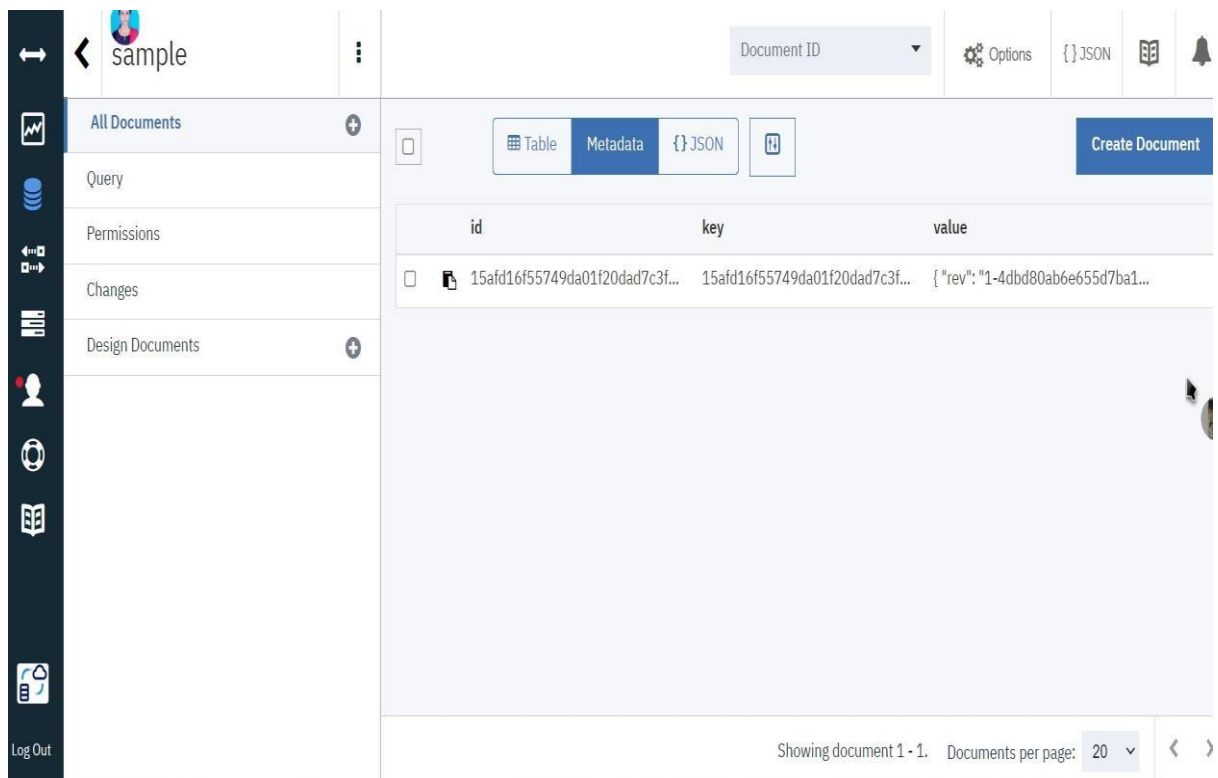

STEP 2

STEP 3

STEP 4

STEP 5

The screenshot shows the IBM Cloud documentation page for Cloudant. The left sidebar lists the navigation menu with 'Introduction' selected. The main content area is titled 'Introduction' and includes a 'Last updated' date of 2022-10-24. It describes IBM Cloudant as a document-oriented database (DBaaS) that stores data in JSON format. A link to the 'Getting started tutorial' is provided. Below this, there is a section for 'Endpoint URLs' which states that the API uses an instance-specific endpoint URL. On the right, there is a tabbed interface for the Python SDK, with the 'Python' tab selected. It shows the installation command: `pip3 install ibmcloudant` and a link to the GitHub repository: <https://github.com/ibm/cloudant-python-sdk>. A 'Feedback' button is visible on the right side of the Python tab.

STEP 6

The screenshot shows the IBM Cloud documentation page for Cloudant, specifically the 'Authentication' section. The left sidebar lists the navigation menu with 'Authentication' selected. The main content area is titled 'Authentication' and includes a 'Last updated' date of 2022-10-24. It describes the authentication process for the Python SDK. A link to the 'Getting started tutorial' is provided. Below this, there is a section for 'Endpoint URLs' which states that the API uses an instance-specific endpoint URL. On the right, there is a tabbed interface for the Python SDK, with the 'Python' tab selected. It shows the authentication code snippet:

```
service = CloudantV1(authenticator=authenticator)
service.set_service_url('{url}')

SDK managing session cookie.

from ibmcloudant.cloudant_v1 import CloudantV1
from ibmcloudant import CouchDbSessionAuthenticator

authenticator = CouchDbSessionAuthenticator('{username}', '{password}')

service = CloudantV1(authenticator=authenticator)

service.set_service_url('{url}')

Basic authentication
```

 A 'Feedback' button is visible on the right side of the Python tab.
