

Assignment -4

Assignment Date	27 /10/2022
Student Name	K. Jeyavarshini
Student Roll Number	142219106038
Team ID	PNT2022TMID21741
Maximum Marks	2 Marks

Question-1:

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less 100 cms send “alert” to ibm cloud and display in device recent events.

Solution:

```
#include <WiFi.h>//library for wifi
```

```
#include <PubSubClient.h>//library for MQTT
```

```
void callback(char* subscribetopic, byte* payload, unsigned int payloadLength);
```

```
//-----credentials of IBM Accounts-----
```

```
#define ORG "za7x6f"//IBM ORGANITION ID
```

```
#define DEVICE_TYPE "rj46"//Device type mentioned in ibm watson IOT Platform
```

```
#define DEVICE_ID "raj46"//Device ID mentioned in ibm watson IOT Platform
```

```
#define TOKEN "R0Q4uhcOcCD0hnom)K"
```

```
//Token String data3; float dist;
```

```
//----- Customise the above values -----char server[] = ORG
```

```
".messaging.internetofthings.ibmcloud.com";// Server Name
```

```
char publishTopic[] = "iot-2/evt/Data/fmt/json";// topic name and type of event perform and  
format in which data to be send
```

```
char subscribetopic[] = "iot-2/cmd/test/fmt/String";// cmd REPRESENT command
```

```
type AND COMMAND IS TEST OF FORMAT STRING char authMethod[] = "use-  
token-auth";// authentication method
```

```

char token[] = TOKEN; char clientId[] = "d:" ORG ":"
DEVICE_TYPE ":" DEVICE_ID;//client id

//-----

WiFiClient wifiClient; // creating the instance for wificlient
PubSubClient client(server, 1883, callback ,wifiClient); //calling the predefined client id by
passing parameter like server id,portand wificredential

int LED = 4;
int trig = 5;

(client.subscribe(subscribetopic))
{
    Serial.println((subscribetopic));
    Serial.println("subscribe to cmd OK");
} else {
    Serial.println("subscribe to cmd FAILED");
}
}

void callback(char* subscribetopic, byte* payload, unsigned int payloadLength)
{
    Serial.print("callback invoked for
topic: ");
    Serial.println(subscribetopic); for (int
i = 0; i < payloadLength; i++) {
//Serial.print((char)payload[i]);    data3
+= (char)payload[i];

```

```
}  
data3="";  
}
```

Reference:

<https://wokwi.com/projects/347322163482591827>

The screenshot displays the Wokwi online IDE interface. On the left, the code editor shows a C++ sketch for an ESP32. The code includes comments and logic for sending JSON payloads to the IBM Cloud IoT Platform based on the distance measured by an HC-SR04 ultrasonic sensor. The right side of the interface shows a simulation of the hardware setup, including the ESP32, the ultrasonic sensor, and an LED. The serial monitor at the bottom right displays the output of the code, showing the JSON payloads being sent.

```
64  /*  
65  | creating the String in in form JSon to update the data to ibm cloud  
66  */  
67  String object;  
68  if (dist < 100)  
69  {  
70    digitalWrite(LED,HIGH);  
71    Serial.println("object is near");  
72    object = "Near";  
73  }  
74  else  
75  {  
76    digitalWrite(LED,LOW);  
77    Serial.println("no object found");  
78    object = "No";  
79  }  
80  
81  String payload = "{\"distance\":\"";  
82  payload += dist;  
83  payload += "\",\" \"object\":\"";  
84  payload += object;  
85  payload += "\"}";  
86  
87  
88  Serial.print("Sending payload: ");  
89  Serial.println(payload);  
90  
91  
92
```

Simulation output:

```
object is near  
Sending payload: {"distance":59.51,"object":"Near"}  
Publish ok  
Distancein cm59.51  
object is near  
Sending payload: {"distance":59.51,"object":"Near"}  
Publish ok
```
