DEVELOP THE WEB APPLICATION USING NODE-RED

Date	16/10/ 2022
Team ID	PNT2022TMID21776
Project Name	Project – IOT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks

Aim: Develop the web application using Node-RED Steps Followed:

• Opened a Node-RED project

• Added code to get child location in python

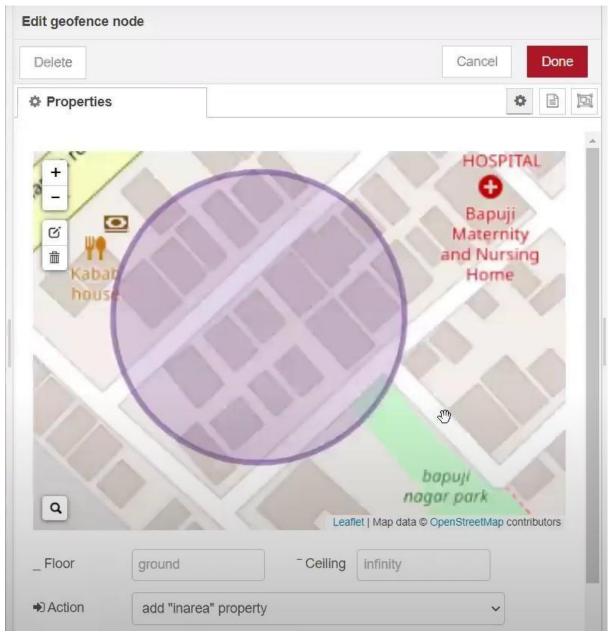

```
import json
import wiotp.sdk.device
import time

myConfig = {
    "identity": {
        "orgId": "hjSfmy",
        "typeId": "NodeMCU",
        "deviceId": "12345"
    },
    "auth": {
        "token": "12345678"
    }
} client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

phile True:
    name= "Smartbridge"
        fin area location
        latitude= 17.4225176
        longitude= 78.5458842
        fout area location

        flatitude= 17.4219272
        flongitude= 78.5488783
        myData=('name': name, 'lat':latitude, 'lon':longitude)
        client.publishEvent(eventId="status", msgFormat="json", data=myData, gos=0, onPublish=None)
        print("Data published to IBM IoT platfrom: ",myData)
        time.sleep(5)
```

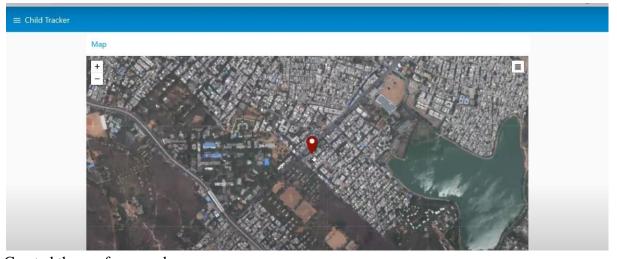

Created the GeoFence

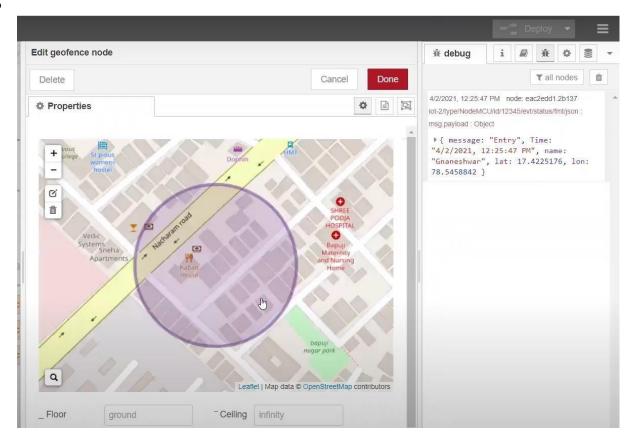

Editing the HTTP Request URL

Edit http request node i 🛮 🖈 💠 🛢 ₩ debug ▼ all nodes 🏚 Done Delete Cancel Properties **≅** Method GET **Q** URL payload}}}&language=english&flash=0&numbers= Payload Ignore ☐ Enable secure (SSL/TLS) connection ☐ Use authentication ☐ Enable connection keep-alive ☐ Use proxy ← Return a UTF-8 string Name Name

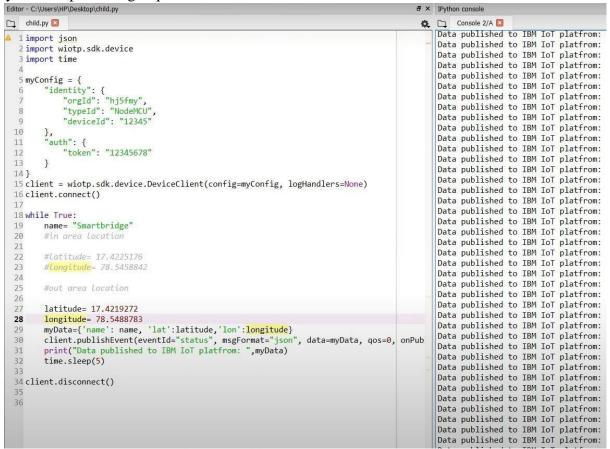

• Located the child

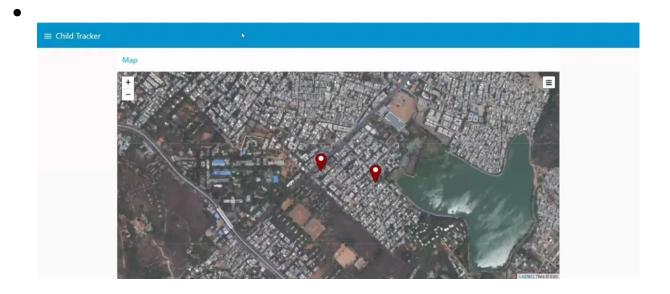

Created the geofence node

Python script sending requests to IBM Cloud

After running the script, the web UI shows "Person is not in the

Result: Successfully developed the web application using Node-RED
